SATURN by Airstar is a new aerial show, starring a performer under a giant turning propeller-shaped balloon. *An unforgettable act to make your guests impressed!*

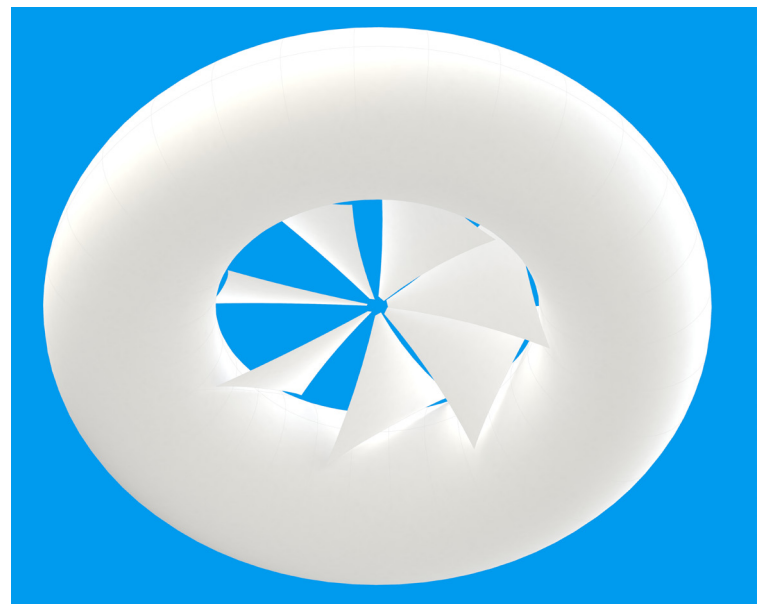

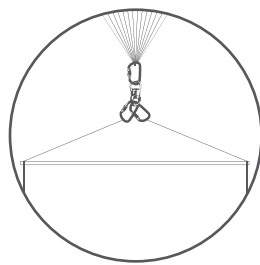

OPTION 1: AERIAL CHIFFON

In a stunning display of grace and strength at heights reaching up to 20 m / 65ft, our Aerial Chiffon artist floats over and around the audience on a whisper of billowing fabric, performing a breathtaking aerial dance which requires agility, flexibility and enormous acrobatic skill.

OPTION 2: AERIAL TRAPEZE

Suspended in the air, our aerialist twirls and pivots on a trapeze performing stunning feats of grace and dexterity in a blend of strength, technique and artistic expression. Performing at times with a single hand or foot through her strap, while hanging upside down and showcasing her dynamic tricks, the element of difficulty and danger will captivate any audience and leave them breathless.
